GOD'S LOVE, AND BEAUTY
"My Father in Heaven, help me never to forget Thy Love to me. It comes with the light of the morning, and it remains with the light of the stars of the night. It looks up at me in the beauty of the flower. It shines upon me in the smile of a friend. All beautiful things are the gifts of Thy love. Help me to be thankful, and to link every beautiful thing with Thee.—Amen."
JOHN HENRY JOWETT
My friends are these your sentiments? If not, why not? **PARK**

Yee, Sister, I buy only of Park; his seeds always grow and yield the finest flowers

DEAR PATRON FRIENDS:

It is with pleasure that I greet you once more at the threshold of a new year. A year which holds hope and faith and prosperity for us all—For regardless of how much or how little of this world's goods we have, we can be rich in our outlook on life—All can enjoy the beauty of God's nature.

I want to pay tribute here to a heroine from real life—My Mother, a God fearing Woman. Mrs. Geo. W. Park. She has always been too bashful to introduce herself here—but because many of you know her through her beautiful letters and feel as personal friends already—I take pleasure in presenting her to you. During the war, Brother William and I were in service and she carried on alone of the Park family.

Sometimes during those years there was not enough help and she worked 16 hours a day to get your orders to you on time. When she was behind you were very patient and understanding—We all thank you for that—We're all thankful to be back at this most pleasant of vocations again—and assure you that your orders will have our prompt and careful attention with our prewar 48 hour service, and the finest seed that can be produced throughout the entire world.

So get up a club or take orders for your friends and get your own seeds free—See quantity prices on Pg. 1—Order early.

And now awaiting your esteemed favors, and assuring you of our best attention, I remain,
Jan. 1, 1947

Floricordially yours,
GEO. B. PARK

Notes on Finest Annual Specialties and Novelties

A real **MINIATURE AGERATUM**, in a new color **49-Silver Star** by name—A dwarf plant 4 in. tall and covered with silvery grey star-shaped flowers. Pkt. 25c; 3 for 65c. Ageratums are easily grown from seed—may be sown where they are to bloom or started indoors in March and set out in May. Plants will bloom from early Summer until August or later, then the smallest plants may be potted in 2 in. pots, cut back severely, and after becoming well started, brought into the house for winter bloom.

FINE DAHLIAS ARE EASILY RAISED FROM SEEDS

They may be planted indoors in March or April and transplanted; or sown outdoors after danger of frost is past. They will bloom and form tubers the first season and then should be handled just as Dahlia tubers bought as named varieties. Because Dahlias are naturally variable, you may often get a new variety from seed. We offer seed saved by a real specialist in Holland from his fine collection of **653-Finest Decorative Dahlias**. Pkt. 25c.

718-DIANTHUS HEDDONSIS WESTWOOD BEAUTY, ha. Free, early, and continuous flowering annual of easiest culture. The rich colors, from fiery crimson to deep velvety red, long wiry stems, large 2 in. deeply fringed flowers on 12 in. plants will give it high place in American gardens. Pkt. 10c; Giant Pkt. 25c.

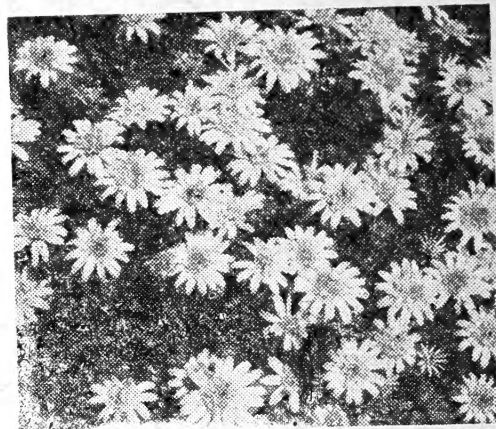

The TRANSVAAL or Barberton Daisy. (Gerbera). Easily raised, but seeds are a little tardy and temperamental about germination and patience and care are required. Slight heat such as a sunny window is needed and seed should be planted with fuzzy pointed end just above the surface, in sandy peat soil. Two weeks after germination occurs the seedlings may be transferred to pots and will flower in about 6 months. A fine long stemmed variety bearing flowers 2-3 in. across of beautiful colors is **863-Jamesoni Hybrids**. 15 seeds for 25c.

1209-LOBELIA GOLDELSE. A beautiful name for a fine new development with dark blue flowers and golden foliage. Habit dwarf. Pkt. 25c.

WE ARE FORTUNATE in being able to offer some very rare Pansy mixtures this year. These came direct from Holland where they are grown by Sluis Brothers who have given Pansies their special attention for years. Winter Flowering Ice Pansies, Curled Double Fringed Mixed, and Orchid Flowering Mixed Pansies all are unusual and worthy of the finest garden.—See pg. 8-9.

We are proud to offer the **DOUBLE PORTULACA** or Rose Moss in separate colors again. See pg. 37.

TORENIA Fournieri. The Wishbone Flower. Resembling small Gloxinias this quaint and beautiful flower is of easiest culture. Best results are had if seed are started inside in early Spring, but may be sown where they are to bloom when frost is over. Likes partial shade and regular watering. Also fine grown as a greenhouse or window garden subject. **2028-Blue**. Pkt. 10c; Giant Pkt. 25c.

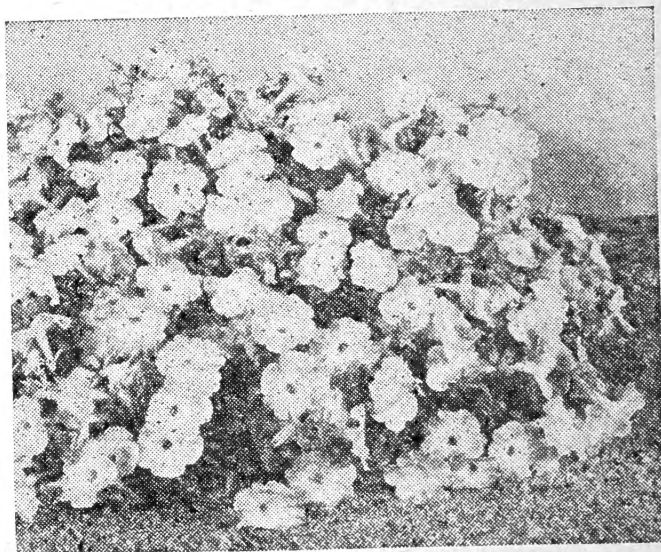

Double Dimorphotheca

DIMORPHOTHECA. Cape Marigold or African Daisy. They like a warm sunny location and should be sown in boxes in March or April for long growing season. Dimorphotheca will flower from early summer until frost and makes a fine border plant. An unusual development in this fine plant has come to us thru the painstaking hybridization and selection work of Mr. Wm. Macdonald in California. Pictured above is **776-Double Flowering African Daisy**. Pkt. 10c; Giant Pkt. 25c.

SALVIA. The Red Sage is a fine border plant, but of so vivid a red that it should be against a background of green because it does not harmonize readily. Dwarf Salvia **1808-Sluis Bros. Primus** is the finest for low borders—earliest of all and brightest of all. Pkt. 25c.

SALVIA PATENS, page 39, will harmonize readily with other flowers. **1820-Blue**, **1819-White**, and a new one **1821-Mauve Queen** which is a striking deep mauve color and comes only in 25c pkts. Any average sunny garden position suits them.

1621—Petunia Brighteyes. Pkt. 10c.

All American last year. 9 in. Rosy pink.

OF THE MANY FINE NEW DOUBLE PETUNIAS— The finest, including those which have won All American Trials, are the **1563-CANADIAN ALL DOUBLES**. Grown especially for us by the only man who is now producing real All Double Petunias. Much emphasis has been placed on the dwarf, low growing, compact petunias which make such fine beds and borders. We have an introduction from our own West Coast grown by Waller Franklin Seed Co., which is the finest of the Dwarf Hybrids so far produced. **Petunia 1597-RUFFLED NANA COMPACTA LITTLE GIANTS MIXED**. 8-12 in. tall, neat, compact, erect all season—a fine bedding or pot plant. Well ruffled and waved deep throated flowers of medium size keep the plants completely covered thruout the season. Well balanced attractive color range. Pkt. 25c.

**DOUBLE BELLFLOWER.**

416—*Campanula Medium Double Mixed*, hb, 4 ft. An unusual and very beautiful flower which will bloom the first season if started early in boxes, but is best the second season. The wood-cut above illustrates the doubleness of its flowers. For other rare Bellflowers see page 44.

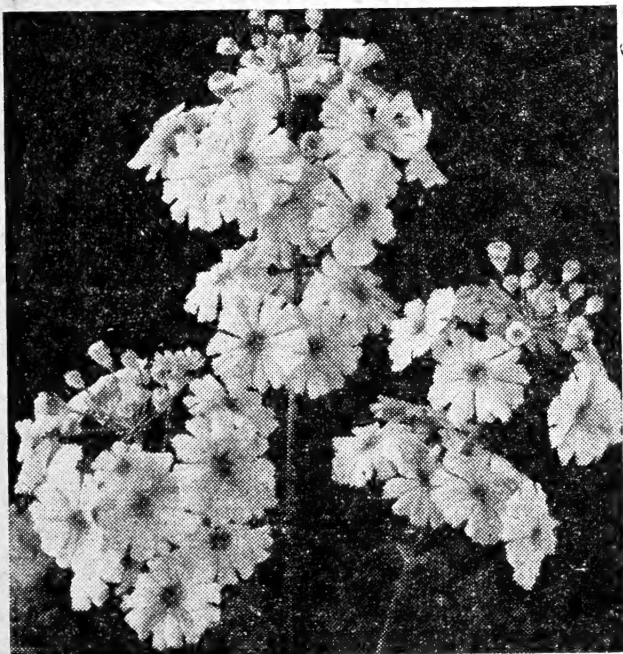

Seed of the perennial Spring Adonis may be sown in spring or fall where plants are to bloom. 23—*ADONIS Vernalis*, hp, 1 ft. Delicate foliage, golden flowers in May or June. Likes light sandy soil. Has not been available for 4 years.

482—CARNATION TRIAL

GROUND MIXTURE. Containing all classes and colors, many of them new, and not yet introduced separately. Pkt. 25c. See pages 24 and 45 for other Carnations.

A SWEETHEART

1738—*PRIMULA Malacoides Sweetheart*. The most unique departure in *Primula* developments, Sweetheart adds a distinct bicolor to the group. The blooms are bright salmon pink, bordered with a wide band of white, softly flushed flesh pink. In the center is a tiny but distinct touch of golden yellow. Pkt. 10c; Giant Pkt. 25c.

1738—*Primula Malacoides, Sweetheart*

Aquilegia, Crimson Star

163—AQUILEGIA CRIMSON STAR

Graceful two foot plants with giant 3 in. flrs of deep coppery crimson with cup-like center of contrasting creamy white. Pkt. 10c; Giant Pkt. 25c.

HANDSOME INCARVILLEA

1035—*Delavayi* and 1036—*Brevipes* are described and pictured on page 48 where full cultural directions are given for this fine and rare plant.

GODDESS OF THE RAINBOW.

A beautiful name well deserved by this fine family. Special attention is called to page 47.

1175—*LILIUM BELLINGHAM HYBRIDS*. Seeds saved from a large collection of West Coast native Lilies. All handsome brilliantly colored plants with yellow predominant. See pg. 48. Pkt. 25c.

1717—*PRIMROSE, DEAN'S CHOICEST COLORED HYBRIDS*. Splendid range of rich colors, large flowers. A magnificent strain.

Perennial Specialties**Chrysanthemum, Korean Hyb. HARDY CHRYSANTHEMUM**

536—*C. Korean Hybrids*. Large brilliantly colored double and single flowers in full array of colors. Completely winter hardy. Fine to cut. Pkt. 10c; Giant Pkt. 25c.

DOUBLE PAINTED DAISIES

were almost unobtainable during the past 5 years and we are happy to offer 1759—*Superior Extra Double Prize Mixture* with a high percentage of giant double flowers and splendid color range. Grown for us by Sluis Bros. in Holland.

STARTING SEED IN BOXES.

Get boxes 18 in. long, 12 in. broad and 4 in. deep. Fill in an inch of well rotted stable litter, then two inches of sandy woods earth or fertile loam, the surface sifted and pressed. Press rows, sow, and cover with fine sand. This will ensure fine stock plants and thrifty growth. See **PARK'S GARDENER'S HANDBOOK** for more complete directions—Sent free with our compliments on request.

FINEST SEED OF SPECIAL WINDOW PLANTS

582—*COLEUS Pride of Montferland*. (Flame Netel). A new strain with large leaves, distinguished by its beautiful colors and markings and robust compact growth. Our finest. Pkt. 25c.

IMPATIENS. (*Sultana* or *Patience*). A favorite houseplant because it blooms almost the year round. Grown mostly in Holland, these were hard to find during the war and we are happy to again offer several varieties on page 57. Among them 1034—*I. Sultani Hyb.* Waxy flowers in many colors. Winter house plant, shady summer border.

BIRD OF PARADISE. 1954—*Streptolizia Regina* is pictured on page 56. Seeds will be available in March. 2 seed for 25c. 1688—*Poinciana gillesi* is also known as Bird of Paradise. See page 56.

574—*CLIVIA MINIATA*—rare and most glorious.

This rare and most glorious of all house plants is sometimes known as the Kafir-lily. Giant trumpet shaped flowers of bright scarlet with yellow throats are borne in umbels atop a 1 ft. stem. Strap-leaved foliage reminds one of the *Amaryllis* family of which it is a member. Easily raised from seed which should be dehusked upon arrival and pressed into light rich loam to which charcoal has been added. Keep moist and warm. Seed 20c each; 3 for 50c. Limited supply—order early.

CHOICE ANNUAL PHLOX

PHLOX DRUMMONDII

This is one of our best annual flowers. At the North, plants should be started in beds or boxes and transplanted, but in the South the seeds may be sown in Spring or Fall where plants are to bloom. They mostly re-seed, and cover the ground with volunteer plants. They like rather sandy, rich soil, and will grow in any garden. Seedlings begin to bloom when small and continue throughout the season. The bright flowers in many colors and variegations appear in big broad clusters. A carpet bed of the plants in special colors makes a glorious display. We offer choice new-crop seeds of the finest races, and can supply the colors separately or all in special mixture. They are hardy annuals, can be sown early.

You'll find that it's really exciting to have a weed-free, velvety-smooth lawn . . . the kind that neighbors envy.

You must start with good seed. Our mixtures are made from high germinating seed in formulas to meet your needs.

But, it does take more than good seed to make a fine lawn. It takes complete plant food! We recommend Vigoro, complete plant food made by Swift & Company. It's balanced for grass.

FACTS ABOUT THE GLADIOLUS

Young corms 2 or 3 years old have a high crown and small basal area. It is from these bulbs that the finest flowers originate. The old bulb will produce a poorer flower with each season it is used. New bulbs are obtained by growing the bulblets on until they reach optimum size of 1½ in. diam. It is from these bulbs that the finest blooms are obtained.

For an outstanding exhibition and colorful bouquet use **Phillis McQuiston** and **Primrose Princess** in combination. Plant 12 of each. 24 bulbs for \$2.25.

PRONOUNCING INDEX AND GERMINATION TABLE

WHEN sowing seeds it is always best to divide the packets and sow at different times. Note the time and give good care until the plants have had time to appear. Figures here indicate pages, and letters indicate, as per key, the time needed for germination. Do not condemn seeds until you have given them at least two or three trials. Those marked z will often lie dormant for a year or more. Seeds of Trees and Shrubs should be sown in a retired bed which will not be disturbed for two or three years. Some will start in a reasonable time and can be removed. Germination, however, is variable and more or less tardy.
